Dear Friends,

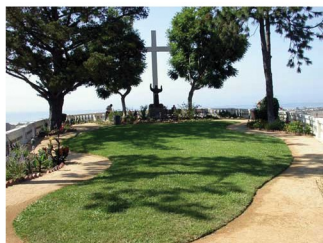

If you happened to miss last September's retreat on the topic of Stability and Mobility, here's your chance to attend a one-day retreat featuring the same related topic of interest. Join us next month at the gorgeous Serra Retreat Center in Malibu as we tackle the fascinating tension between "displacement and togetherness" as well as "stability and mobility" in our communal journey. Be sure to invite others too!

Retreat Guide & Facilitator: Wil Hernandez, Ph.D.

This retreat/workshop explores the intriguing dynamics of Henri Nouwen's communal journey revolving around the compelling reality of stability and mobility in all our journeying experience. Through Nouwen's own example, we can learn how to navigate our way through its existing tension more productively---between placement and movement and our own need for both 'roots' and 'wings' in our community life.
